Cleveland Hearing & Speech Center

Program Evaluation Summary
2017

Speech Language & Learning Department
Summary of Services
CHSC speech-language pathologists (SLPs) served a total of 3,597 clients across our office and community locations. In our offices we saw 925 of these clients, the remainder were seen in Head Start, school, or day care settings. Services provided included: 410 evaluations; 410 clients seen for individual therapy, and 57 clients participated in group treatment sessions. Clients presented with a variety of diagnoses, including aphasia, apraxia, expressive language disorder, mixed receptive/expressive language disorder, phonological disorder, hearing loss, stuttering, voice disorder or reading disorder. There were seven clients provided coaching for foreign accent modification.
Outcomes & Effectiveness

CHSC speech-language pathologists use the National Outcomes Measurement System (NOMS). The team began reporting NOMS data in July 2013. New staff have completed NOMS training during their orientation period. Adult data continues to be limited based on the number of clients who are on the therapy schedule that were admitted and discharged in 2017.

At CHSC 60% of preschoolers in NOMS are discharged from the program without meeting goals due to attendance issues or parent request (child receiving services at school) as compared to the national average of 7.5%. ASHA has indicated that in the near future they will be changing their outcomes reporting. At this time, they do not have a system for tracking school age therapy clients.

Outcomes

In 2017 we also tracked outcomes in-house. Demographics reflect the clients who come to CHSC for services. Expected outcomes are that clients improve the ability to communicate.

Actions: We expect that clinicians will input data more consistently by using prompts in the Electronic Medical Record (EMR) system. We continue to analyze data and research for trends and changes that can positively impact outcomes. Goals for 2018 include increased parent participation in therapy. Another goal is to decrease the duration of therapy and increase discharge of clients who are within normal limits. CHSC continues to have a large wait list for evening times. We are investigating how to decrease the wait through more evening and possibly weekend times. We also will begin tracking no show and cancellation rates through the EMR system to identify changes that may need to be made with the attendance policy.

Client Satisfaction
Client satisfaction surveys were offered to all speech pathology and audiology clients seen in 2017. Surveys were available in paper form at the front desk and via ipad for use with Survey Monkey. Surveys continue to be available throughout the year in paper form at the front desk and all speech therapy observation rooms. There were 103 clients who participated in 2017. Generally, satisfaction with speech pathology and audiology services was high with an overall rating above 6 on a 7 point scale.

Action: CHSC has discussed with therapists ways to better communicate evaluation results and therapy programs with families and offer them an opportunity to contact the therapist following the appointment if they still have questions by giving them the clinician’s business card. CHSC is looking into ways to increase participation in the survey including using the new Practice Management system to gather responses and / or to distribute more frequently. With the new PM/EMR system implemented at the end of 2016, there is a function that will allow us to email satisfaction surveys to current and past clients. We are investigating this option for the agency and HIPAA compliance.

### Would you return to CHSC for services?  

- yes 98%

### Would you recommend our services to a family member or friend?  

- yes 98%
Efficiency
Efficiency is measured by tracking hours produced (billable time) as well as cancelation/no-show rates. This was not tracked in 2017 due to the incompatibility of the EMR reporting system and collection of data in this area.

Cancellation/No-show rates NA

Year-to-year analysis, by office:
University Circle - NA
Actions: NA

South Euclid - NA
Actions: NA

Broadview Heights NA
Actions: NA

Actions: At the end of 2017, programming coordinators from the EMR company were working for a way to pull this information in 2018. The office managers did work to create a plan for increased efficiency, scheduling, and client satisfaction. The plan is called the “road to joy”.

Accessibility of Services
The client satisfaction survey in 2017 included measures of accessibility. Clients were asked to rate the convenience of our office locations as well as the convenience of our hours of operation.

Actions: As part of the current strategic plan, we plan to make services more accessible by opening up to 5 offices in the next three years to expand our service area.
